Dedication ceremonies for the Rosalind Russell Arthritis Research Laboratory, a component of the UCSF Rosalind Russell Medical Research Center for Arthritis, will be held on Thursday, December 3 at 11 a.m. in the lobby of the new hospital at SFGH. A reception will follow in the laboratory on the third floor of Building 30.

Governor Brown, and community and medical leaders will attend, along with the late Rosalind Russell's husband, Frederick Brisson.

The preceding day, as part of the decication activities, two special lectures on arthritis will be given at Medicine Grand Rounds in Cole Hall at 10:30 a.m. J. Claude Bennett, professor, Medicine and chief, Division of Clinical Immunology and Rheumatology, University of Alabama at Birmingham, and president, American Rheumatology Association, will speak on "The Role of Microbial Agents in Chronic Rheumatic Diseases." Gerald Weissman, professor, Medicine and director, Division of Rheumatology, NYU, and president-elect, American Rheumatology Association, will speak on "Activation of the Neutrophil in Inflammation."

The Rosalind Russell Arthritis Research Laboratory is under the direction of Ira M. Goldstein. Ephraim P. Engleman is director of the Rosalind Russell Medical Research Center for Arthritis.

The second annual "Chancellor's Distinguished Lecturer for the Public Understanding of Science" will be Arnold S. Relman, MD, editor of the *New England Journal of Medicine* and professor of Medicine at Harvard Medical School.

Relman will be on campus Monday to Wednesday, December 14 to 16, and will present his major address, entitled "Medicine as Commerce," in Cole Hall on Wednesday at 4 p.m. Earlier the same day he will present Medicine Grand Rounds in Cole Hall at 10:30 a.m. During the preceding two days he will meet with faculty and students in small informal sessions.

Relman, who edits one of the most prestigious medical journals in the world, is a member of the Institute of Medicine of the National Academy of Sciences and a fellow of the Hastings Center Institute of Society, Ethics and the Life Sciences. He was a visiting scientist in Biochemistry at Oxford, 1975-76, and was Frank Wister Thomas Professor of Medicine and chair of the Department of Medicine, University of Pennsylvania School of Medicine, 1968-77.

The Chancellor's Lectureship brings a distinguished national science writer or communicator to UCSF each year for a three-day dialogue with faculty, students and staff, as part of an effort by the campus to strengthen public understanding of biomedical science. Departments or groups who wish to meet with Dr. Relman should contact the Chancellor's Lectureship Committee, c/o Brenda Patterson, x2557.

PULMONARY PHYSIOLOGY SEMINAR:

NEWS BRIEFS

The campus community is invited to attend UCSF's Long Range Development Plan Restudy Meeting on Thursday, December 3 in Toland Hall from noon to 1 p.m.

The purpose of the meeting is to help redeisgn the 1976 development plan by discussing some of the University's preliminary thoughts on the future directions and challenges facing UCSF in the tight-budgeted 1980's. Discussion will focus on studies currently underway, including academic program needs, student and faculty housing, classroom and instruction space support, traffic and parking, utility use, food services, materials/logistical support, recreation, architectural site plans, open space and landscaping plans.

For further information contact Vice Chancellor George Evanoff at x4318.

The University of California walked off with many top honors at the AAMC (Association of American Medical Colleges) meeting in Washington, D.C. this month.

UCSF's J. Michael Bishop, recently named director of the Hooper Foundation, received the 1981 Award for Distinguished Research in Biomedical Science; Alan Goldfien, associate dean, School of Medicine, was named chair for the Group on Medical Education; and *UCSF Magazine* won the top award for "Excellence in Medical Education Public Affairs." In addition, Dean Julius R. Krevans, School of Medicine, stepped down as chair of the AAMC and of the total program.

On another campus, Dean Sherman M. Mellinkoff of UCLA won the prestigious Flexner Award for distinguished service to medical education.

Robert Layzer, MD, professor of Neurology, is the winner of the 18th annual J. Elliott Royer Award and its $15,000 cash prize.

Layzer was selected for his outstanding contributions as a clinician and teacher. Letters nominating him for the award cited his work in clinical and research programs dealing with muscle disease, including establishment of the UCSF Muscle Clinic, the major referral center for patients throughout Northern California and the western states.

Layzer, who joined UCSF in 1967 and has been director of the Muscle Clinic since its establishment in 1968, is nationally known as one of a handful of clinicians in the country who has made major advances in the treatment of neuro-muscular disorders. His research accomplishments include identification of new forms of neuromuscular disease and exploration of their biochemical bases.

The Royer Award honors the memory of the Oakland physician who died in 1961. Royer left an endowment and instructions to the UC Regents to single out the S.F. or East Bay physician who has made "the most significant contribution to the advancement of psychiatry and neurology during the past year." The award was presented November 17 at the annual dinner meeting of the Alameda/Contra Costa Medical Society.

Two UCSF research fellows have tied for third place in the Residents Research Essay Contest of the American Society of Anesthesiologists.

Co-winners are Dennis Fisher, MD, of the Department of Anesthesiology, and Peter Gencarelli, MD, who recently completed his residency at UCSF. The awards were announced at the recent meeting of the Society in New Orleans.

Fisher was a principal investigator for a study on the sensitivity of infants, children and adults to the muscle relaxant, d-tubocurarine, which commonly is used during surgical procedures. The study used new mathematical techniques to correlate the movement of this relaxant within the body with the production of relaxation.

Gencarelli was principal investigator for a research project on the interaction of inhaled anesthetics, such as enflurane, with muscle relaxants in achieving neuromuscular blockade (paralysis), a condition desirable for surgery.

The Alexander Simon Reading Room/Library will be dedicated on Friday, December 11 at 4 p.m. at SFGH. The presentation will be made by Leon Epstein, acting chair, Psychiatry.

The reading room, located in the Department of Psychiatry on the seventh floor of the hospital, is named after UCSF Professor Emeritus Simon, in recognition of his many contributions to clinical and academic psychiatry. Simon is a former medical director of LPPI and currently works in the geriatric service unit of the Southeast Community Mental Health Center.

Anyone interested in donating scientific books, journals or money to help continue the purchase of current periodicals and supplies for the library should write to: Alexander Simon Library, SFGH, Rm. 7M12, 1001 Potrero Ave., S.F. 94110, Attn: Frank Johnson.

Olivia H. Moore, administrative assistant, Division of Internal Medicine, won the raffle prize of "brunch for two" at the Alta Mira Hotel in Sausalito as a result of the Blood Donation Day raffle in October. The prize is donated by the ASUCSF.

A total of 211 units of blood were donated by the campus and community. The next campus blood drive is scheduled for Monday, March 8, 1982.

A new study on the problematic states of mind produced by positive events is being conducted by the Stress and Anxiety Clinic, LPPI Center for the Study of Neuroses.

The clinic has specialized for years in the treatment of individuals who are traumatized by the experience of serious life events involving loss or injury. This new study will look at a different class of life events which, while considered positive, can lead to trauma. For example marriage, job promotion, or receiving an award can lead to trauma because of increased responsibility and greater demands for decision making or productivity.

The center will provide diagnostic and clinical services for those who have increased levels of nervousness, fear, shame, guilt, or despair due to these changed life conditions, or who recently have been bothered by extreme procrastination or indecision in key life areas.

The center is directed by Mardi Horowitz, MD and co-directed by Nancy Kaltreider, MD. For further information on this new study contact Janice Krupnick; information on the study dealing with stress related to injury or loss, contact Geri Krasner, both at x77-513. For further information on the center's continuing study on individuals experiencing death of a parent or spouse, call x77-510.

Roger W. Sperry, recent winner of the Nobel prize in Physics, analyzes the question of whether conscious experience can exist apart from the functioning brain, in an essay in the current issue of Möbius, the quarterly journal published by Continuing Education in the Health Sciences. Sperry's article is entitled "Mind-Brain Interaction: Mentalism, Yes; Dualism, No."

According to Sperry, the concept of dualism affirms the existence of independent mental and physical worlds and supports the hypothesis that conscious experience can exist apart from the brain, thereby opening the door to a conscious after-life and other supernatural beliefs. The concept of mentalism (monism), on the other hand, answers "no" to the hypothesis and is restricted to one-world dimensions.

The Hospitals Auxiliary is sponsoring a benefit evening at the "Search for Alexander" exhibit at the M.H. de Young Museum in Golden Gate Park Thursday, March 4 from 6:30 to 8:30 p.m.

The show is of Greek antiquities dating back to the 4th century BC, and includes several objects from the royal tomb at Vergina discovered in 1977 and thought to be that of Alexander's father, Philip of Macedon.

The exhibit is made possible by the National Bank of Greece and *Time* Incorporated, with the cooperation of the Greek Ministry of Culture and Sciences. This presentation in S.F. is made possible by a personal contribution from Alex G. Spanos.

Tickets for this benefit evening will go on sale in December. For further information contact the Auxiliary Office at x4906 between 10 a.m. and 2 p.m.

The Barnett Briggs Medical Library at SFGH will demonstrate its new computerized bibliographic search service on Thursday, December 10 (times to be posted). The computer terminal system, located on the second floor of the Library in Building 30, can access Medline — another search service tied into the National Library of Medicine, and approximately 45 other data bases. It was recently purchased for the Library by the Associate Dean's Office. Services of the clinical librarian, Carol Imah, are provided by the Southeast S.F. Area Health Education Center (AHEC) and UCSF.

Consultations for computer searches are available to SFGH Tuesday through Thursday, 10 a.m. to 5 p.m. by contacting Carol Imah at 821-5242. At other times contact Miriam Hirsch, medical librarian at 821-8553. Fee schedules and forms for computer searches can be obtained in the library.
